

x7 Plan - Drain & Intersection

**Project Elements**

- A. New drain mouth with sump for suspended solids and drain pipe to ferry dock pile for low tide drainage
- B. Existing drain mouth closed off and with storm water pipes through beach to sea. Slot left at top of end wall for heave storm drainage.
- C. Drain sides raised 8" and full length covered
- D. Relocation or possible removal of security fence
- E. Construction of Planters with seating, soil fill ground cover and shubbery, approx. 50 S.Y.
- F. Extension / diversion of walway to direct pedestrians off intersection and delineation of existing walkway with matching finish
- G. Widening of road corner to ease traffic flow.
- H. Sidewalk cover to open drain between Tannis and Knight's corners with removable hatches.
- J. Organised parking bays using gravel and 2x4 g.heart sleepers pegged down.
- K. Spiky plant island between stone curb and walaba log curb to replace security fence. (subject to Port Authority approval)
